EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Arne I. Fors on 11/11/04.

The application has been amended as follows:

- cancel claim 1;
- Amend claim 6, line 1, replace "1" with --9--;
- Amend claim 7, line 1, replace "1" with --9--;
- Amend claim 8, line 1, replace "1" with --9--;
- add claim 9 as follows --

9. (NEW) A continuous method for cutting expanded, punched or cast continuous metal mesh strip freshly pasted with a polymer-free paste without the use of paper barriers to create paperless battery plates for use in lead acid batteries, the method comprising the steps of: providing a cutting device including a cutting roll having cutting blades mounted thereon, an index mechanism and an anvil roll opposed to said cutting roll for receiving the freshly pasted and paperless continuous metal mesh strip therebetween; and heating said cutting blades, the cutting roll, the index mechanism and the anvil roll to a temperature in the range of about 160 to 300 °C whereby the paste from the

freshly pasted and paperless continuous metal mesh strip does not adhere to the heated cutting blades, the cutting roll, the index mechanism and the anvil roll during the cutting of the freshly pasted and paperless continuous metal mesh strip with said heated cutting device into discrete paperless battery plates. --

2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose or suggest the method of freshly pasting metal mesh strip with a polymer-free paste and cutting the strip without the use of paper barriers by heating the cutting device and indexing mechanism. All of the prior art references disclose cutting papered metal strips not paperless metal strips in order facilitate cutting and prevent sticking between the paste and the cutting device. All of the prior art references failed to appreciate the need or ability of cutting paperless metal mesh strip into paperless battery plates by heating the cutting device.

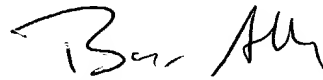

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Boyer D. Ashley whose telephone number is 703-308-1845. The examiner can normally be reached on Monday-Thursday 7:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allan N. Shoap can be reached on 703-308-1082. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
